ALBERTA MANUFACTURERS

1951 EDITION

DEPARTMENT of INDUSTRIES and LABOUR EDMONTON ALBERTA CANADA

INTRODUCTION

The purpose in publishing the following list of industries and products of the Province of Alberta, Canada, is to provide those interested with comprehensive particulars of the products manufactured or processed in the province, and the names and addresses of firms engaged in the various industries.

No trade directory has been published since 1947. That year marked the great discovery of oil in the Leduc district, and a new era of industrial expansion began. Since then, progress has been rapid in the manufacture of petroleum products and the industry now ranks second in the role of manufacturing and processing within the province. In addition, the increased oil production has stimulated enterprise in the allied industries of chemical, iron and steel, and many others, by the foregoing discoveries in the industrial realm. Not alone has industry prospered but the merchandising and service establishments in Alberta and the neighbouring provinces have felt a great upsurge in retail sales and revenue within the past few years. Contingent on the unprecedented favourable conditions, there are more and better opportunities for employment than ever before. It is now felt a new directory is necessary to meet and to mark the growing demands of industry and to aid in increasing the rapid industrial development.

For the first time, a section classifying wholesalers and distributors in specific lines of industry is included to meet the wishes of industrialists who are desirous of possessing such a list.

The Industrial Development Board, Department of Economic Affairs, co-operated in making this list as complete and up-to-date as possible. The Board stands ready to assist and advise industrialists and distributors wishing to become established in Alberta, in all matters relating to new and existing markets. Where advantageous to producers and consumers, new industries are encouraged to locate in the Province of Alberta.

For markets Overseas, the Board's functions do not parallel nor overlap those of the Federal Trade Commissioners. However, the Board does seek to co-ordinate their efforts in relation to the economy of Alberta.

It is almost impossible to issue a list of industries which is perfectly accurate and up-to date. New industries are being established and older ones changing locations. However, every effort has been made to have this directory as accurate as possible. In the case of errors or omissions this department will appreciate receiving notification.

Alberta is indeed a fortunate province and its noteworthy development throughout the years has attracted the attention of industrialists and those interested in its wealth of natural resources. From a few industries in 1906 centering chiefly in agricultural products valued at \$5,000,000, to over 1900 manufacturing establishments in 1950 embracing in addition the wide fieldsof minerals, chemicals, textiles, leather, steel products, etc., all valued at approximately \$400,000,000, is a noteworthy record as the following figures will reveal.

LIST OF INDUSTRIES AND PRODUCTS - ALBERTA

Commodities are listed in alphabetical order, by cities, towns, villages, etc. Instead of furnishing the names and addresses of those engaged in each individual classification, industries are grouped, although the rule is not followed in all cases. This was done in order that small industries who failed to make a detailed report should not be overlooked. Under the group caption in the index letter section will be found a list of the establishments which manufacture the items specified, although not specially designated as such in detail.
